ZAXN 6_9_12 / 56

AXIAL FANS WITH DIRECT DRIVE FOR BUILDING VENTILATION AND AERATION

Based on two fans connected in series, suitable for underground car park extract air (66% redundancy in emergency mode)

- Suitable in horizontal and vertical style.
- The desired operating point is achieved with the best efficiency due to the optional number of blades (6 / 9 / 12).
- Optimised outlet guide vanes for increasing the pressure coefficients, so low-noise operation due to low circumferential speed
- Extensive adjustments to the relevant operating point and subsequent motor rating corrections can be made by steplessly adjusting the impeller blades without any need to disassemble the impeller
- The total pressure increase is double that of single fans.
- Casing available in all RAL colours
- 15 sizes
- Impeller's nominal diameter 315 to 1,600 mm
- Volume flow rate 400,000 m³/h max.
- Total pressure increase max. 4,500 Pa

Application

Application

- Supply or exhaust air as round duct fan
- Free inlet or connected to the pipeline on the inlet side
- Free outlet or connected to the pipeline on the outlet side

Description

Accessories

- Volume flow rate measuring unit VME
- Shock pulse bearing monitoring STI
- Thermal motor protection
- Acoustic insulation
- Weather protection roof for acoustic insulation
- Round silencers TSR (inlet and outlet side)
- Round silencers TSR with interior core (inlet and outlet side)

- Extension duct
- Inspection hatch
- Self-powered shut-off damper
- Flexible connectors
- Matching flange
- Equipotential bonding
- Bellmouth
- Cover grille (inlet and outlet side)
- Diffuser
- Diffuser with interior core
- Outlet duct with cover grille
- Mounting feet (for horizontal assembly)
- Brackets (for vertical assembly)
- Spring anti-vibration mounts
- Rubber anti-vibration mounts
- Local isolator attached (terminal box not required)
- Angular wall ring with brackets (inlet and outlet side)
- Flow redresser
- Silicone-free type
- Surface protection powder-coated and/or hot-dip galvanised in corrosion protection category C2 to C5M

DETAILED DESIGN

HERE YOU'LL HAVE DIRECT ACCESS TO SELECT THE ZAXN VIA THE TROX X-FANS PRODUCT CONFIGURATOR

Following features are at your disposal::

- Based on your requirements of volume-flow, pressure and installation arrangement including desired accessories select the ideal fan...
- Appropriate selection according to required power, sound, nominal size, price and production period
- Options and accessories get assessed for plausibility
- All required documents (e.g. technical specification, tender specification, certificates, drawings etc.) of specific selected fan to be downloaded or send by E-Mail
