TROX® TECHNIK

The art of handling air

WELCOME TO THE X-FANS PRODUCT CONFIGURATOR

The product configurator is a powerful design program that calculates all fans suitable for the application and the required operating point and makes them available for selection.

In the field of technical building services you can

- **find** the suitable fan for the respective application
- **design** the fan immediately at the appropriate operating point
- Save **projects**
- Create **drawings**
